National Oceanic and Atmospheric Administration

U.S. Department of Commerce, Washington, DC 20230

Phone, 202-482-2985

[For the National Oceanic and Atmospheric Administration statement of organization, see the *Federal Register* of Feb. 13, 1978, 43 FR 6128]

The National Oceanic and Atmospheric Administration was formed on October 3, 1970, by Reorganization Plan No. 4 of 1970 (5 U.S.C. app.). Its principal functions are authorized by title 15, chapter 9, United States Code (National Weather Service); title 33, chapter 17, United States Code (National Ocean Survey); and title 16, chapter 9, United States Code (National Marine Fisheries Service).

The Administration's mission is to explore, map, and chart the global ocean and its living resources and to manage, use, and conserve those resources; to describe, monitor, and predict conditions in the atmosphere, ocean, Sun, and space environment; to issue warnings against impending destructive natural events; to assess the consequences of inadvertent environmental modification over several scales of time; and to manage and disseminate long-term environmental information.

The Administration is responsible for reporting the weather of the United States and its possessions and provides weather forecasts to the general public;

issuing warnings against such destructive natural events as hurricanes, tornadoes, floods, and tsunamis; and providing services in support of aviation, marine activities, agriculture, forestry, urban air-quality control, and other weather-sensitive activities. The Administration also monitors and reports all non-Federal weather modification activities conducted in the United States.

The Administration conducts an integrated program of management, research, and services related to the protection and rational use of living marine resources and their habitats, and protects marine mammals and endangered marine species. It prepares and issues nautical and aeronautical charts, provides the Nation's precise geodetic surveys, and conducts broad research programs in marine and atmospheric sciences, solar-terrestrial physics, and experimental meteorology, including weather modification. The Administration also predicts tides, currents, and the state of the oceans; conducts research and development aimed at providing alternatives to ocean dumping; and develops sound national policies in the areas of ocean mining and energy. It provides Federal leadership in promoting wise and

balanced management of the Nation's coastal zone.

In addition, the Administration provides satellite observations of the environment by operating a national environmental satellite system; and conducts an integrated program of research and services relating to the oceans and inland waters, the lower and upper atmosphere, space environment, and the Earth to increase understanding of the geophysical environment. It acquires, stores, and disseminates worldwide environmental data through a

system of meteorological, oceanographic, geodetic, and seismological data centers.

The Administration also manages and directs the oceanic research programs by providing grants to institutions for marine research, education, and advisory services; develops a system of data buoys for automatically obtaining and disseminating marine environmental data; and promotes the development of technology to meet future needs of the marine community.

National Telecommunications and Information Administration

[For the National Telecommunications and Information Administration statement of organization, see the *Federal Register* of June 5, 1978, 43 FR 24348]

The National Telecommunications and Information Administration (NTIA) was established in 1978 pursuant to Reorganization Plan No. 1 of 1977 (5 U.S.C. app.) and Executive Order 12046 of March 27, 1978 (3 CFR, 1978 Comp., p. 158), by combining the Office of Telecommunications Policy, Executive Office of the President, and the Department of Commerce's Office of Telecommunications to form a new agency reporting to the Secretary of Commerce. Its functions are detailed in the National Telecommunications and

Information Administration Organization Act (47 U.S.C. 901 *et. seq.*).

The Public Telecommunications Facilities Program (PTFP) was transferred to NTIA in 1979 from the Department of Health, Education, and Welfare pursuant to the Public Telecommunications Financing Act of 1978 (47 U.S.C. 390 *et seq.*), to take advantage of NTIA's technical and policy expertise. Also, NTIA administers the National Endowment for Children's Educational Television under title 47 United States Code, section 394.

The Administration's principal responsibilities and functions include:

—serving as the principal executive branch adviser to the President on
